SUMMARY

DevOps engineer with hands-on, project-based experience automating CI/CD pipelines using Jenkins and GitHub Actions, provisioning AWS infrastructure with Terraform and Ansible, and deploying Java applications via Maven to Apache Tomcat. Built and tested complete pipelines — from webhook-triggered builds to live deployment on EC2 — independently through self-driven projects. Looking to bring this automation-first approach to a team that needs faster, more reliable deployments.

SKILLS

CI/CD & Version Control: Jenkins, GitHub Actions, Git, GitHub

Cloud Platforms & Services: AWS, AWS IAM, AWS CLI, EC2, VPC, Public Subnets, Security Groups, EBS, AWS S3, Auto Scaling, ALB / Load Balancer, IAM Policies, CloudWatch, Orchestration

Infrastructure as Code & Configuration Management: Terraform, Ansible

Containerization & Orchestration: Docker, Kubernetes (K8s), Helm

Monitoring & Observability: Prometheus, Grafana

Scripting & Operating Systems: Linux, Shell scripting, Python, Bash, Cron

Build Tools & Application Servers: Maven, Apache Tomcat, Tomcat Manager

Artifact Management & Code Quality: SonarQube, JFrog Artifactory

Networking Protocols: TCP/IP, DNS, HTTP/HTTPS, SSH, SSL/TLS

WORK EXPERIENCE

upSkill Campus, in collaboration with UniConverge Technologies

Data Science & Machine Learning Intern — May 2026 - Jun 2026

- Built a Random Forest ML model for quality prediction in a mining process using a 150 MB industrial dataset.
- Conducted data visualization and trend analysis on agricultural crop production data across India.
- Utilized Git LFS to manage and version large-scale datasets on GitHub for collaborative ML pipeline development.
- Worked on real-world industrial datasets to build and evaluate end-to-end machine learning pipelines.

PROJECTS

CI/CD Pipeline Automation | Jenkins, GitHub, Git, Linux

- Built a Jenkins CI/CD pipeline that automatically builds and deploys the application when code is pushed to GitHub.
- Set up GitHub webhooks to trigger Jenkins jobs on every commit, eliminating manual build steps.
- Used Jenkinsfile to define build and deployment stages with post-build notifications for success and failure tracking.
- Tested end-to-end: code checkout, dependency install, build, and deployment to a Linux server.

Jenkins CI/CD Pipeline with Maven Build & Tomcat Deployment | Jenkins, Maven, Apache Tomcat, AWS EC2, GitHub

- Installed Maven Integration and Deploy to Container plugins in Jenkins for automated Java web app build and deployment.
- Configured GitHub webhook triggers so every commit auto-initiates a new Jenkins build without manual steps.
- Set up Tomcat Manager credentials in Jenkins and used Deploy to Container plugin to auto-deploy WAR file to Tomcat 11 on EC2.
- Verified live deployment via EC2 public IP, confirming full CI/CD pipeline worked end-to-end.

End-to-End Infrastructure Automation & CI/CD Deployment Pipeline | AWS IAM, Terraform, Ansible, Jenkins, GitHub, Maven, Apache Tomcat

- Created IAM user with programmatic access and configured AWS CLI for secure, script-based infrastructure provisioning.
- Wrote Terraform (.tf) configs to provision 3 EC2 instances, a VPC, public subnets, and security groups — cutting manual setup by ~90%.
- Used Ansible playbooks to auto-install and configure Jenkins and Tomcat on EC2 servers, automating ~85% of server setup.
- Created cron-triggered Jenkins job to auto-pull from GitHub, debugged build failures, and achieved consistent pipeline success.
- Configured Maven build (mvn clean package) with auto-deploy to Tomcat — zero manual deployment steps end-to-end.

EDUCATION

ZP High School

SSC (10th) - 95% — 2020 - 2021

Sri Vikash Junior College

Intermediate (MPC) - 70.3% — 2021 - 2023

Kotha Hanumaya & Lakshmi Kotamma Degree College

Bachelor of Science (B.Sc) in Computer Science - CGPA: 7.95 / 10 (Major: 79.5% | Overall: 75.14%) — 2023 - 2026

CERTIFICATIONS

- DevOps Training — Intellipaat
- AWS Solution Architect Course — Intellipaat
- Microsoft Azure Fundamentals (AZ-900) — Microsoft Learn
- Advanced Python Certification — Simplilearn
